

## ABA INTEGRATION OVERVIEW

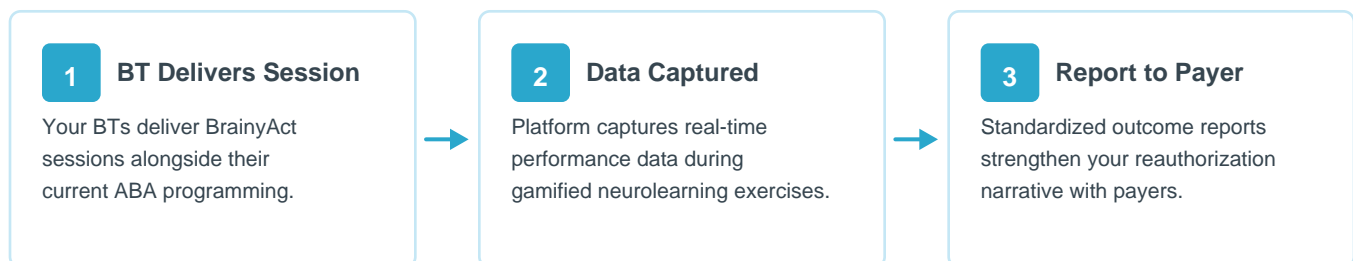

# Add whole-child outcomes to your ABA model.

Without adding staff. Without adding complexity.

## THE CHALLENGE

Payers are pushing for whole-child outcomes, but most ABA clinics can't deliver without partnering out to OT and speech providers. That fragments care for families, complicates reporting, leaves margin on the table, and makes it harder to compete for preferred provider status.

## HOW BRAINYACT INTEGRATES INTO YOUR ABA WORKFLOW

## WHAT STAYS THE SAME FOR YOUR CLINIC

- ✓ **Your BTs deliver it.**  
No new specialists to hire, credential, or manage.
- ✓ **It flows through your claims.**  
No new billing codes. No additional operational complexity.
- ✓ **Your workflow stays intact.**  
BrainyAct layers in alongside existing ABA programming.
- ✓ **You own the outcomes.**  
Standardized data strengthens your reporting and payer positioning.

CLINICAL OUTCOMES | N ~ 150 Participants | Wilcoxon signed-rank test | All results  $p < 0.001$

**143%**

**Bilateral Coordination**

Improvement in synchronized contralateral movement accuracy (n=147)
